

ULTRA RANGE OF
BELT DRIVE
ELECTRIC OPERATORS

IT'S SO SIMPLE!

There are two aspects to convenience: comfort and reliability.

SIMPLY BRILLIANT!

Simple click on your mini hand transmitter from the comfort of your car seat and let the operator mechanism do the rest. Powerful and almost silent. Not even bad weather can dampen your mood because you won't be getting wet.

You can even open the door and switch on the driveway lighting while you are still some way off if necessary.

The standard range of ultra operators are available in various models to suit most types of garage door.

For garages with no available power supply we recommend the AKKU Plus operator which works from a rechargeable battery unit.
